

OUR FABRIC RTI EXPERTISE

As a Microsoft Fabric Real-Time Intelligence partner, Quadrant converts enterprise operational data into real-time intelligence using Fabric IQ and Foundry IQ.

By unifying industrial signals, enterprise systems, and analytics, organizations gain predictive insights, trusted reporting, and automated decisions moving from raw data to enterprise intelligence faster.

QPREDICT 360

Predictive analytics on Fabric RTI with automated anomaly detection.

INDUSTRY USE CASES

Manufacturing

Predict failures, reduce downtime.

Oil & Gas

Monitor pumps and compressors in real time

Utilities

Improve reliability of distributed assets

Automotive

Detect anomalies in assembly systems

Pharma

Maintain compliant and reliable operations

DATA SOURCES

- IoT Devices
- Enterprise Applications
- Industry Data Models
- Structured and Unstructured Data

FABRIC RTI & IQ

- EventStream
- EventHouse DB
- Activator
- Fabric Ontology
- Fabric Data Agents
- Graph in Fabric
- Operations Agent
- Real Time Dashboard

AI FOUNDRY

- AI Models
- AI Agent Service
- Foundry IQ
- Tools
- Machine Learning
- Custom Agents

Let's connect to drive innovation together.

Start your Real-Time Intelligence journey with Quadrant – connect with our experts to accelerate smarter, faster business decisions.
